

SBC Meeting

BURLINGTON ELEMENTARY SCHOOL

Burlington, MA

August 20, 2024 © 2023 DiNisco Design, Inc.

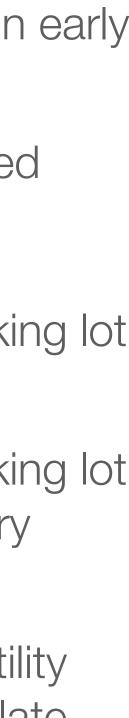

esign Associates ed study of totovoltaic (PV) panels in early August 2024

ptions were studied

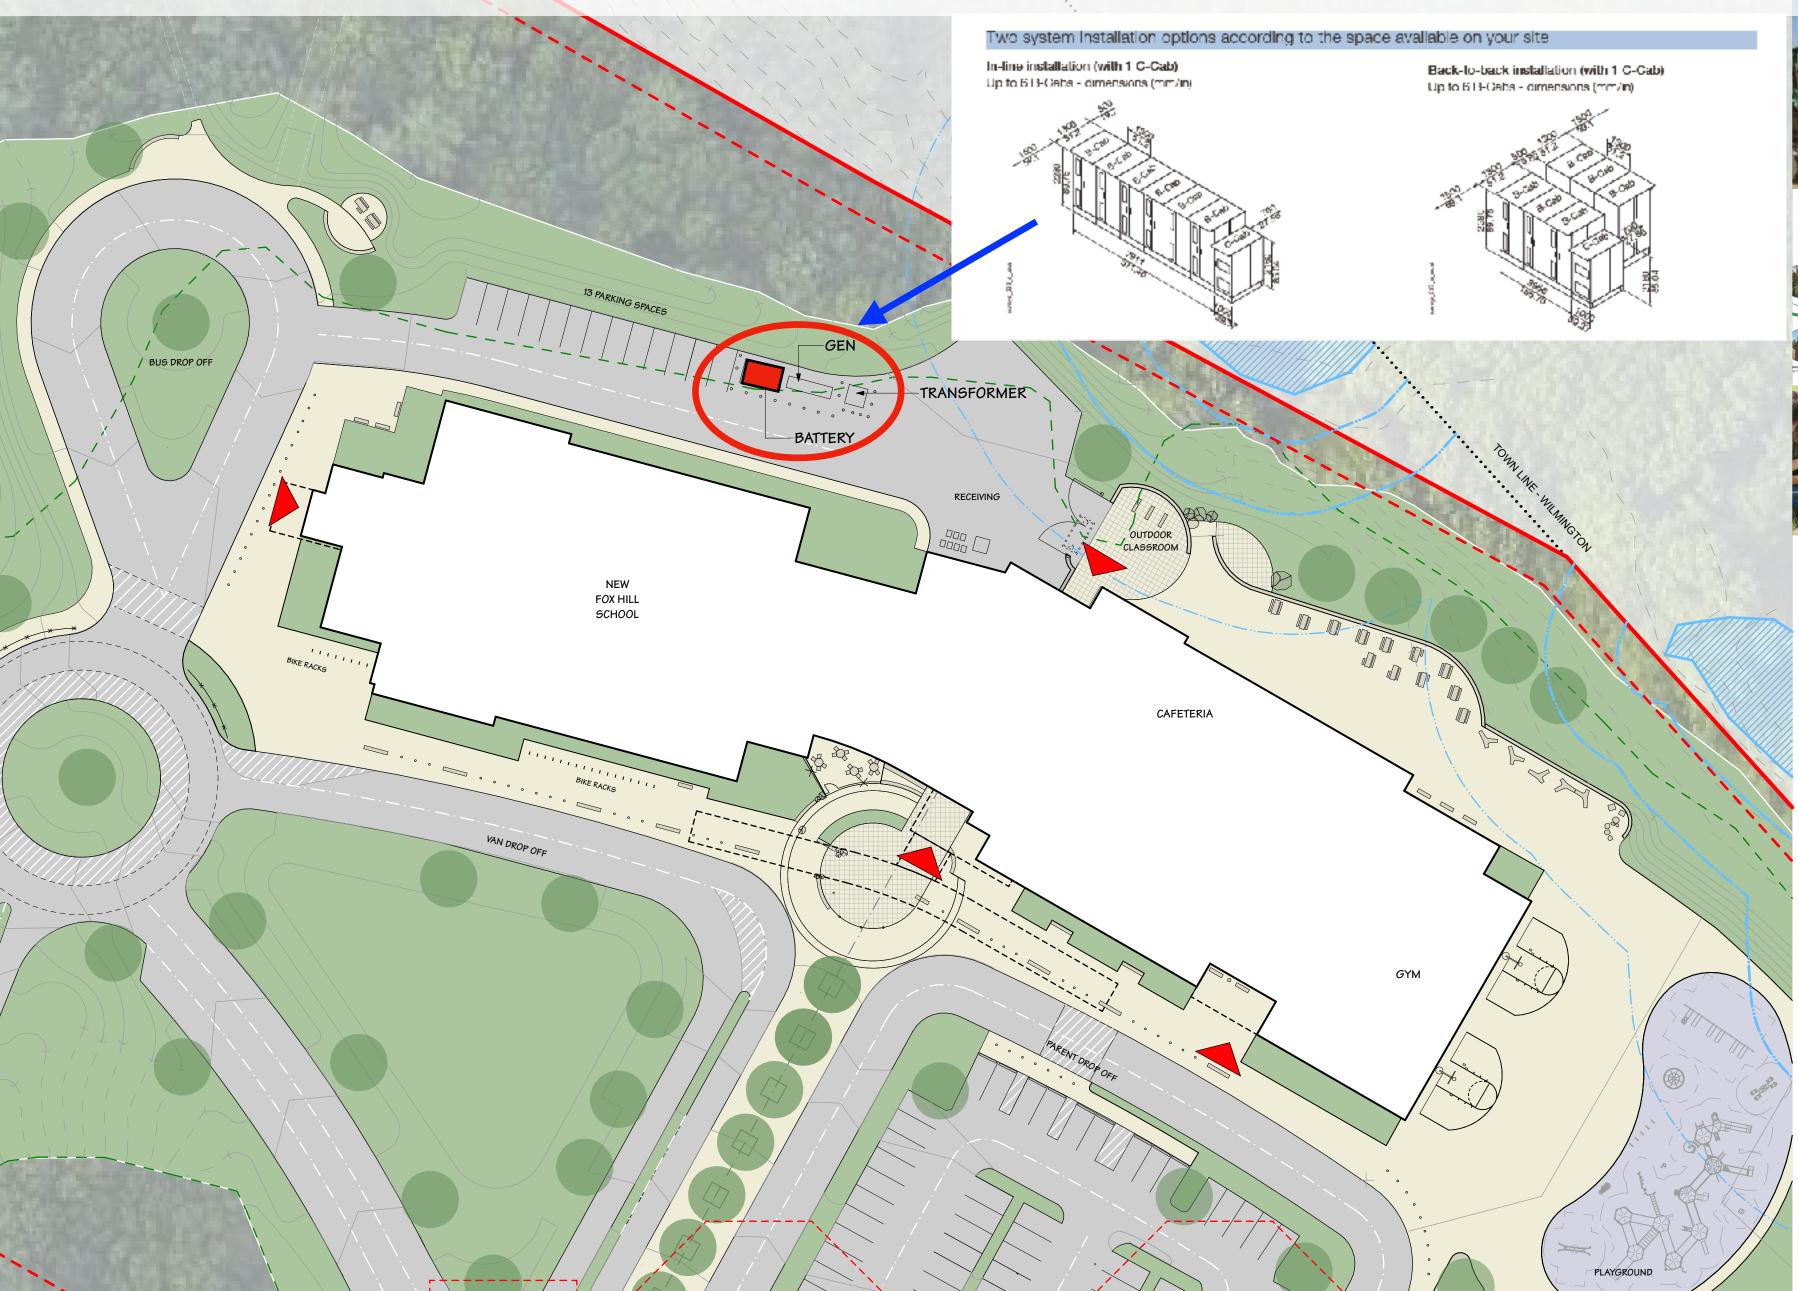

The PVs

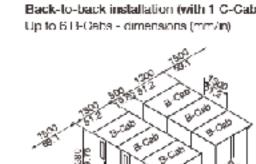

top PVs and parking lot <u>cano</u>pies

- top PVs and parking lot canopies plus a battery system
- Incentives and avoided utility costs were used to calculate the payback period

Solar Study Site Plan

Option a large battery quired

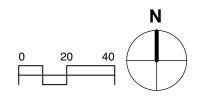

• Battery is to be located adjacent to generator and transformer

> rce will pay Burlington to e battery to the grid ring peak demand periods

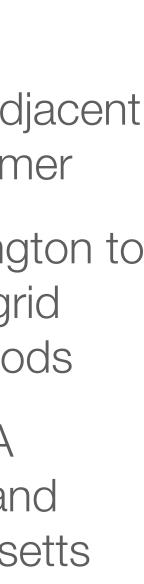

(ln)

attery has additional IRA Reduction Act) and (Solar Massachusetts

Renewable Target) incentives

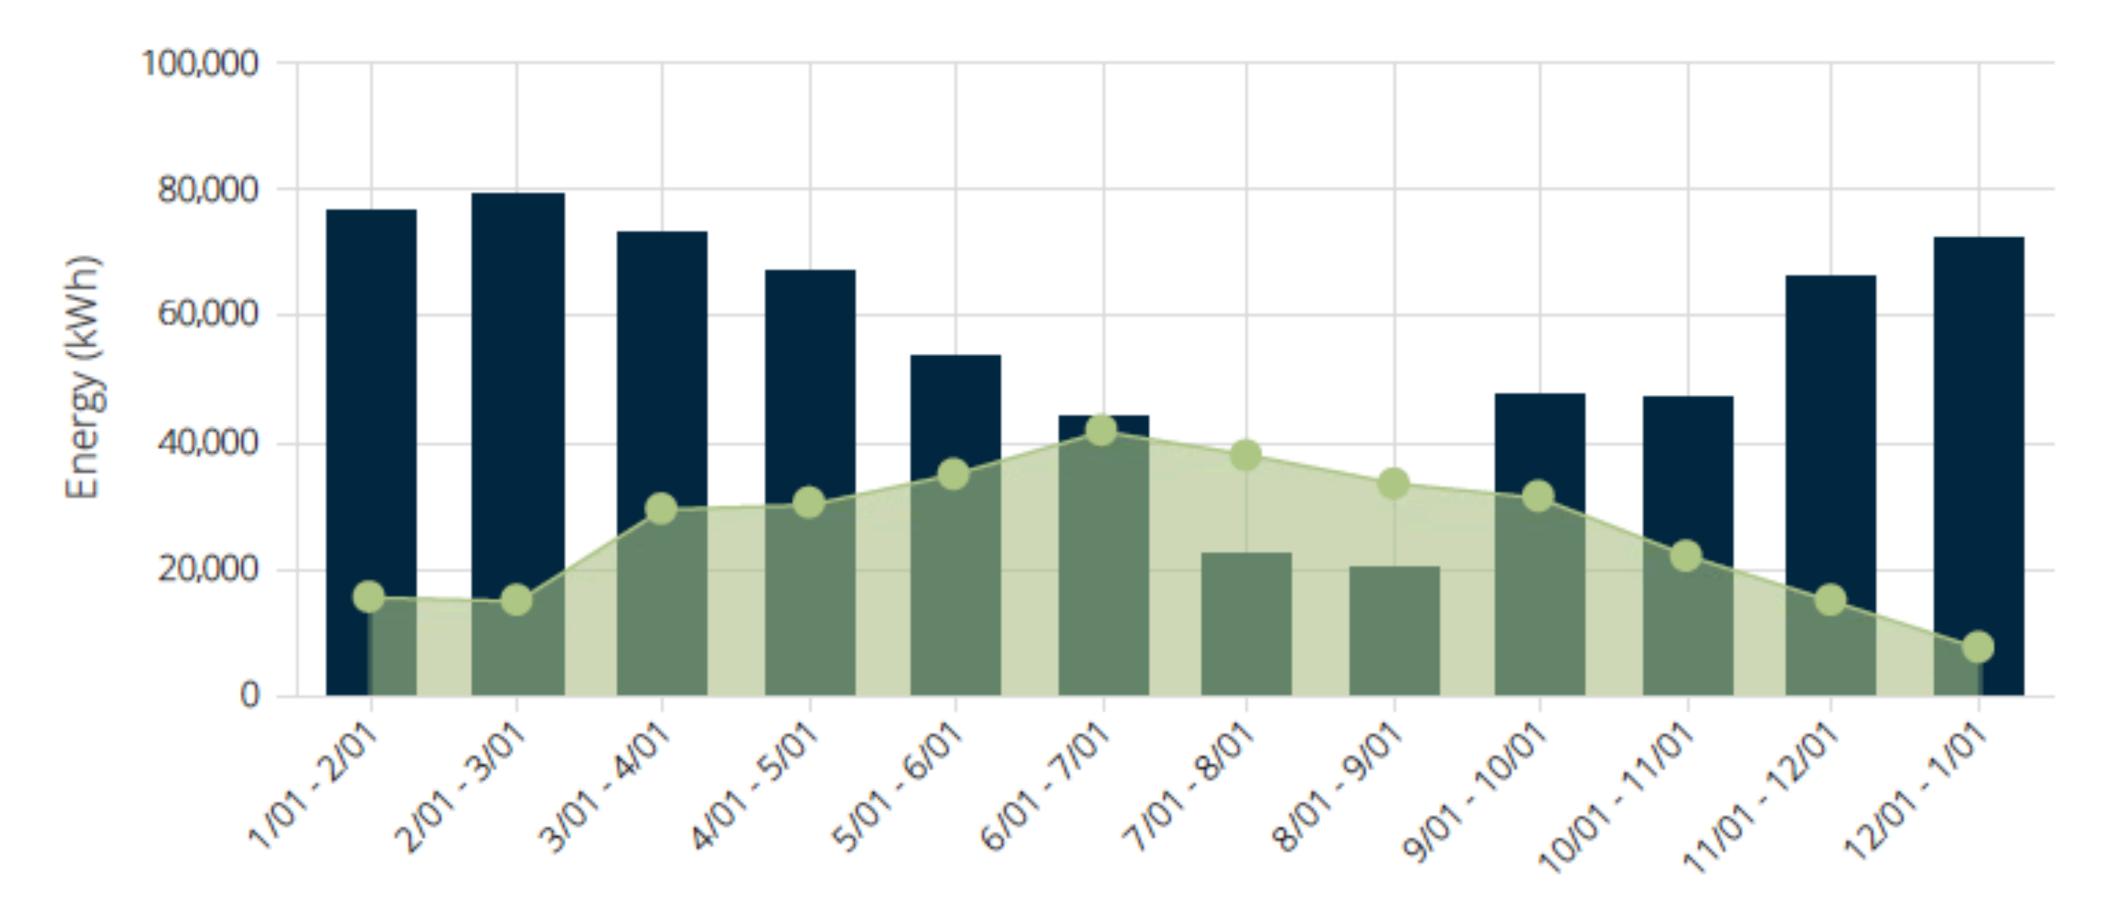

SBC Meeting | 20 August 2024 3

Solar Study | Energy Use vs. Generation (Rooftop PV)

Monthly Energy Use vs Solar Generation

Energy Use (kWh) Annual Use 669,000 kWh

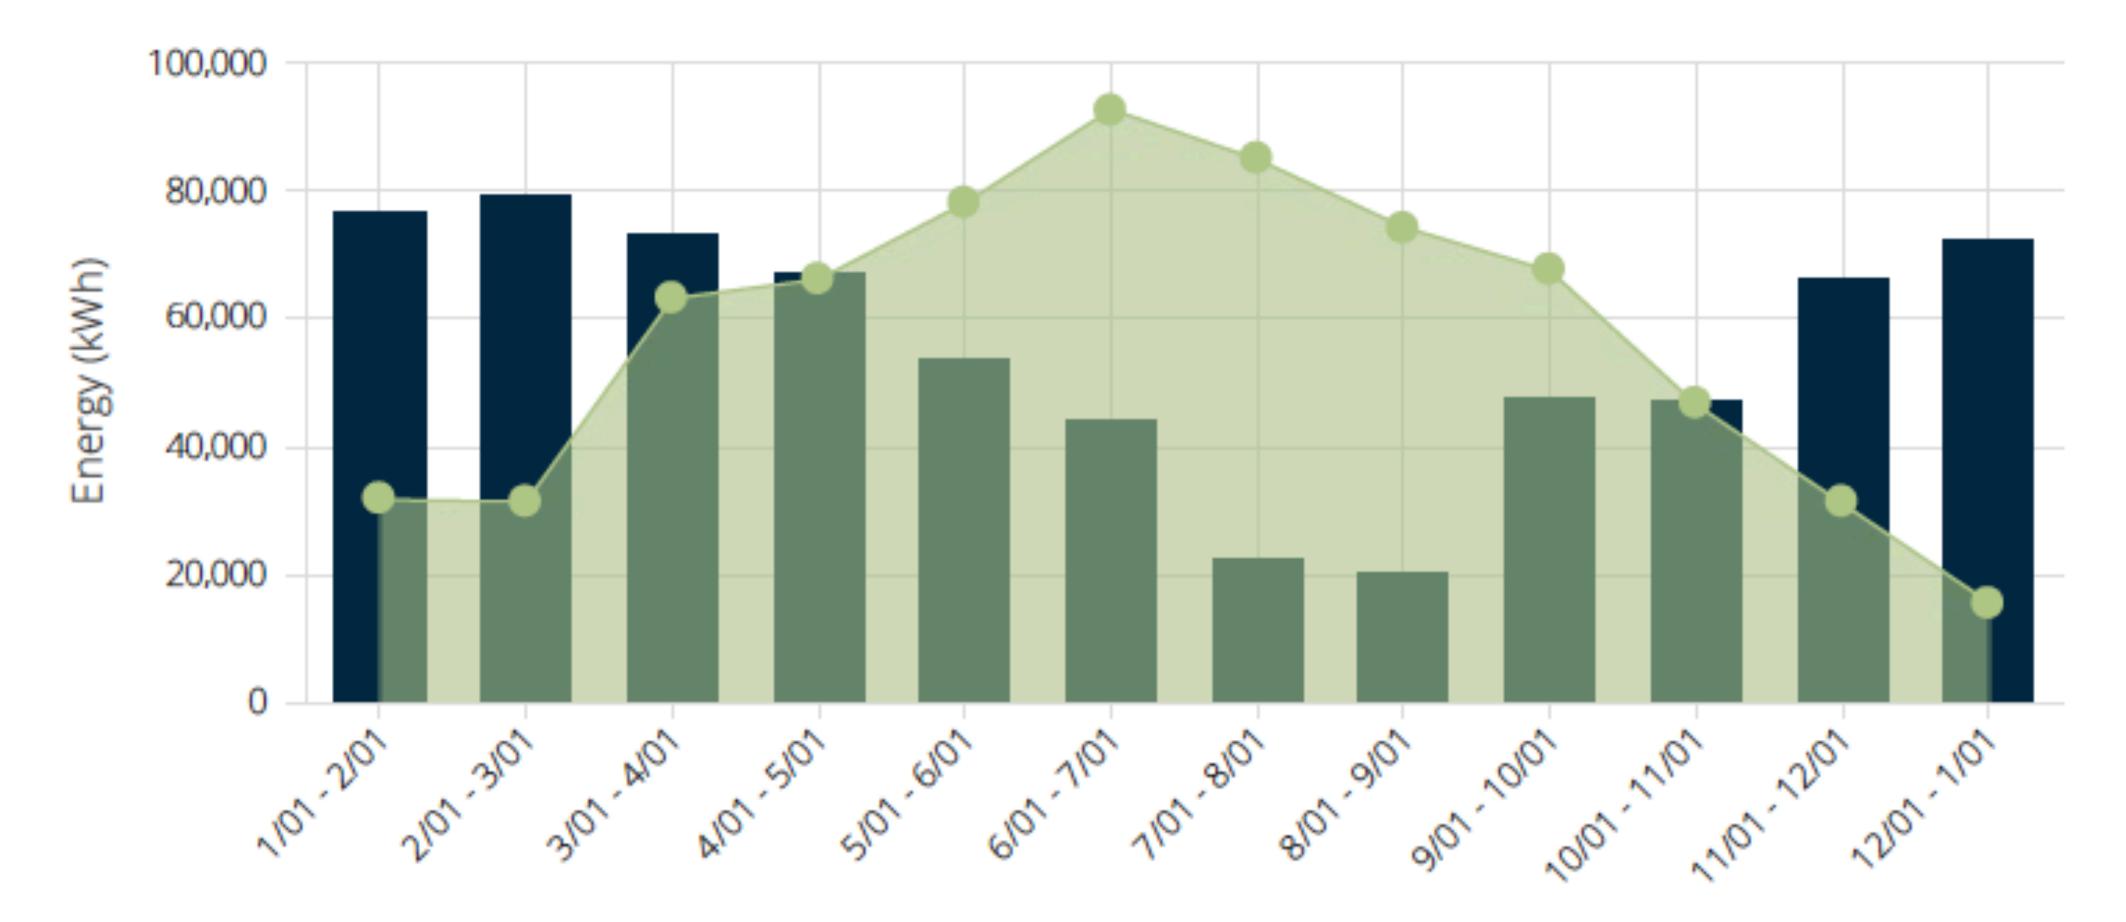

Solar Generation (kWh)

Annual Generation 313,972 kWh (46.9% of Energy Use)

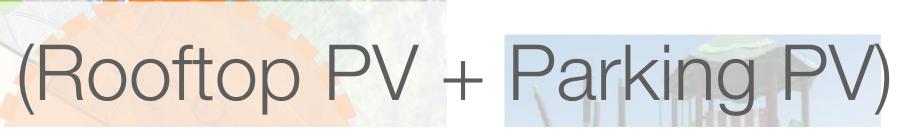

Solar Study Use vs. Generation (Rooftop PV + Parking PV)

Monthly Energy Use vs Solar Generation

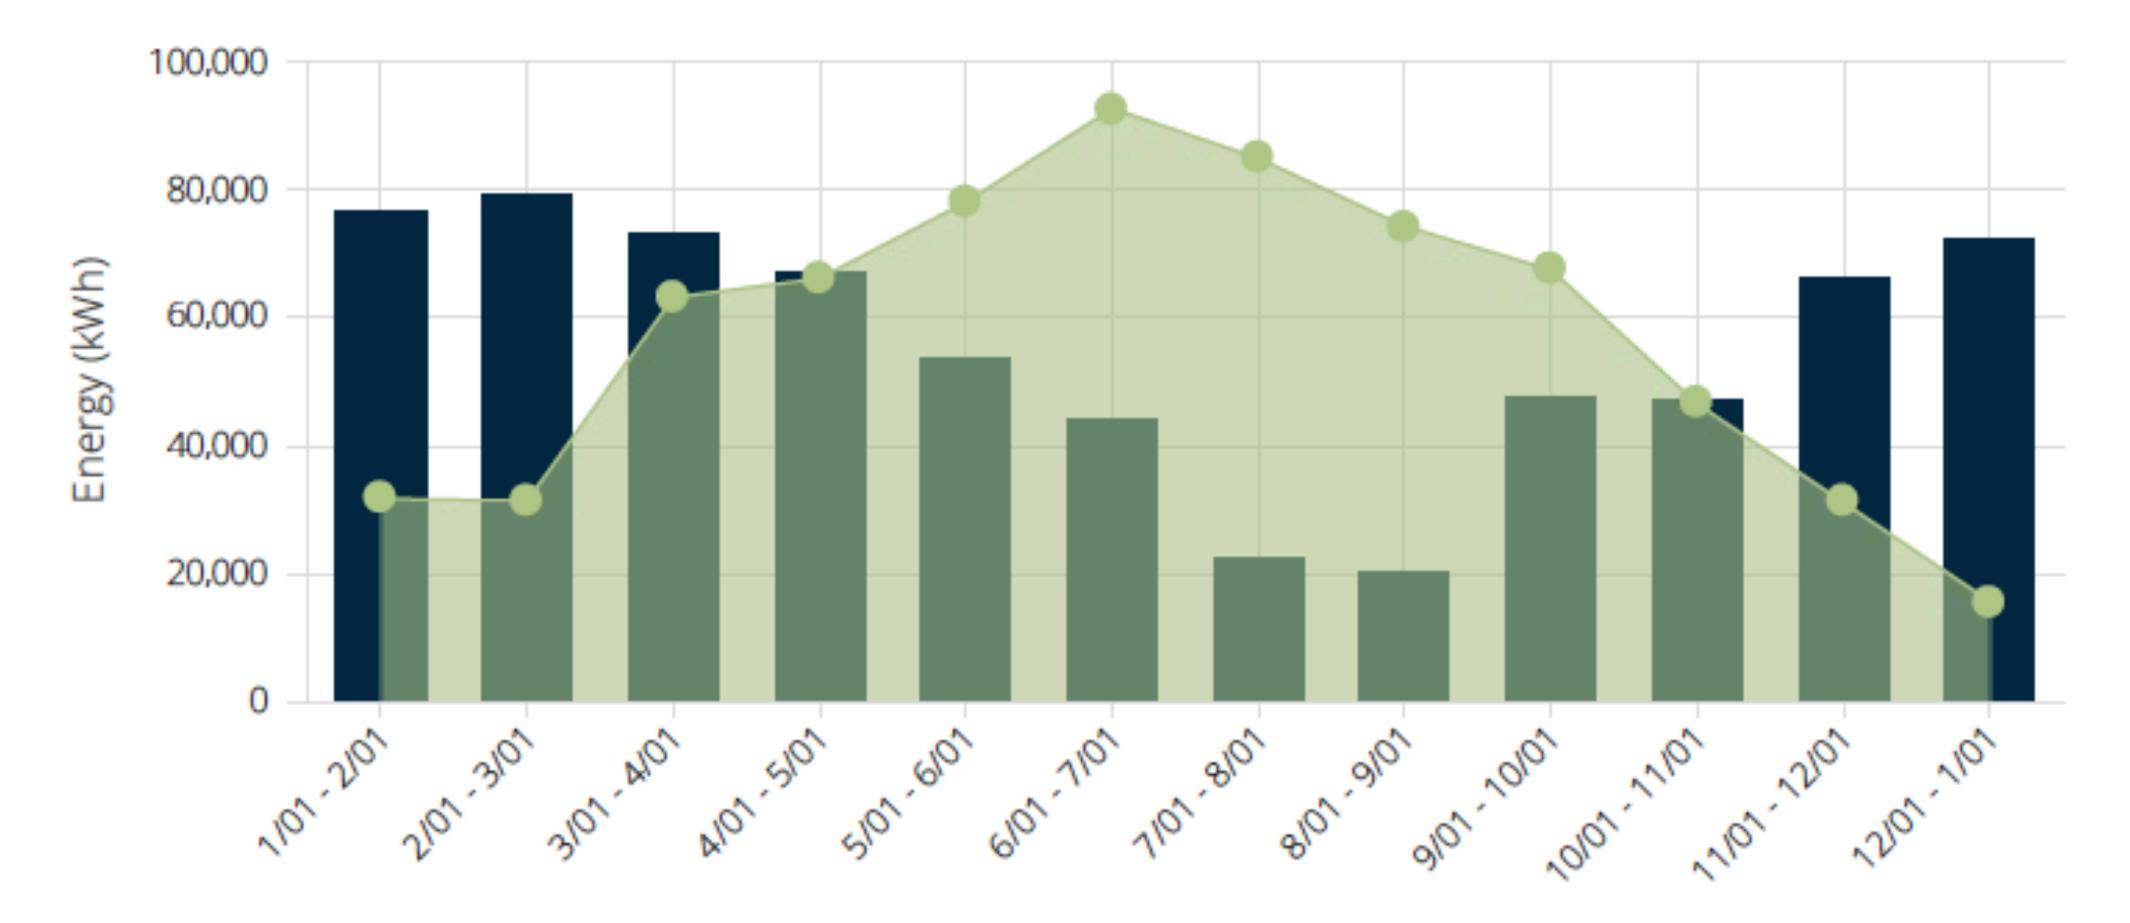

Solar Generation (kWh) Annual Generation 683,531 kWh (102% of Energy Use)

Solar Study | Use vs. Generation (Rooftop PV + Parking PV + ESS)

Monthly Energy Use vs Solar Generation

Energy Use (kWh) Annual Use 669,000 kWh

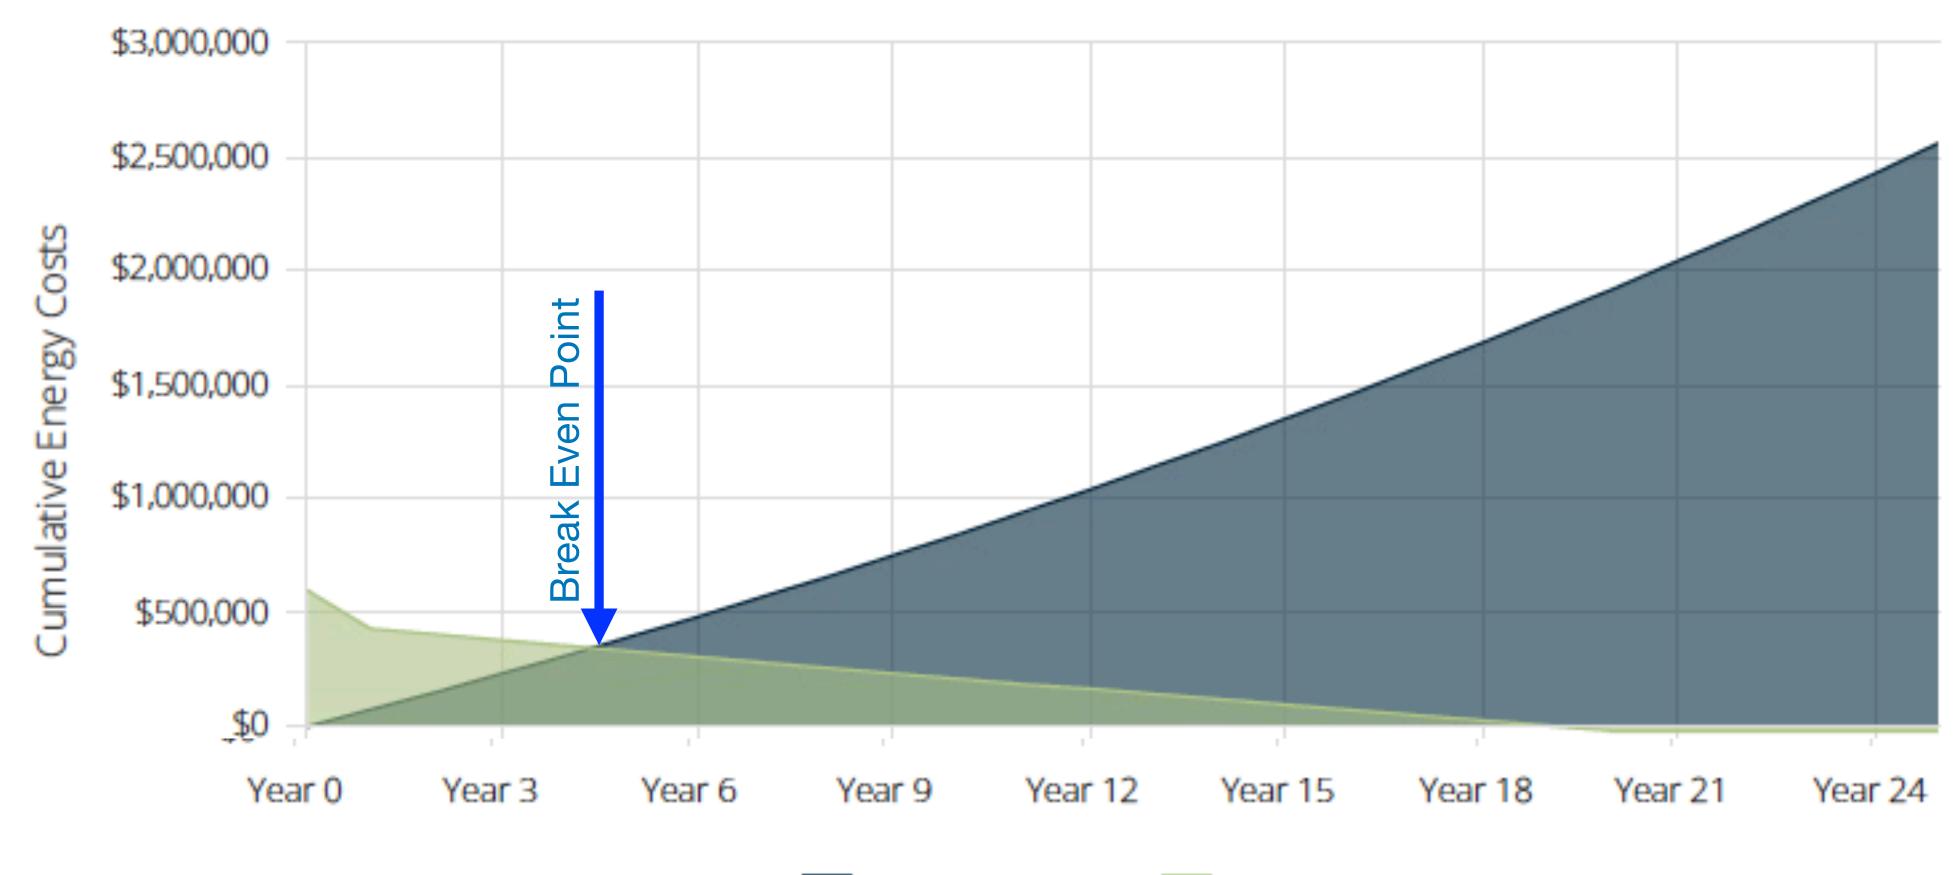

Solar Generation (kWh) Annual Generation 683,531 kWh (102% of Energy Use)

Solar Study Energy Costs (Rooftop PV only)

Cumulative Energy Costs By Payment Option

DINISCO DESIGN

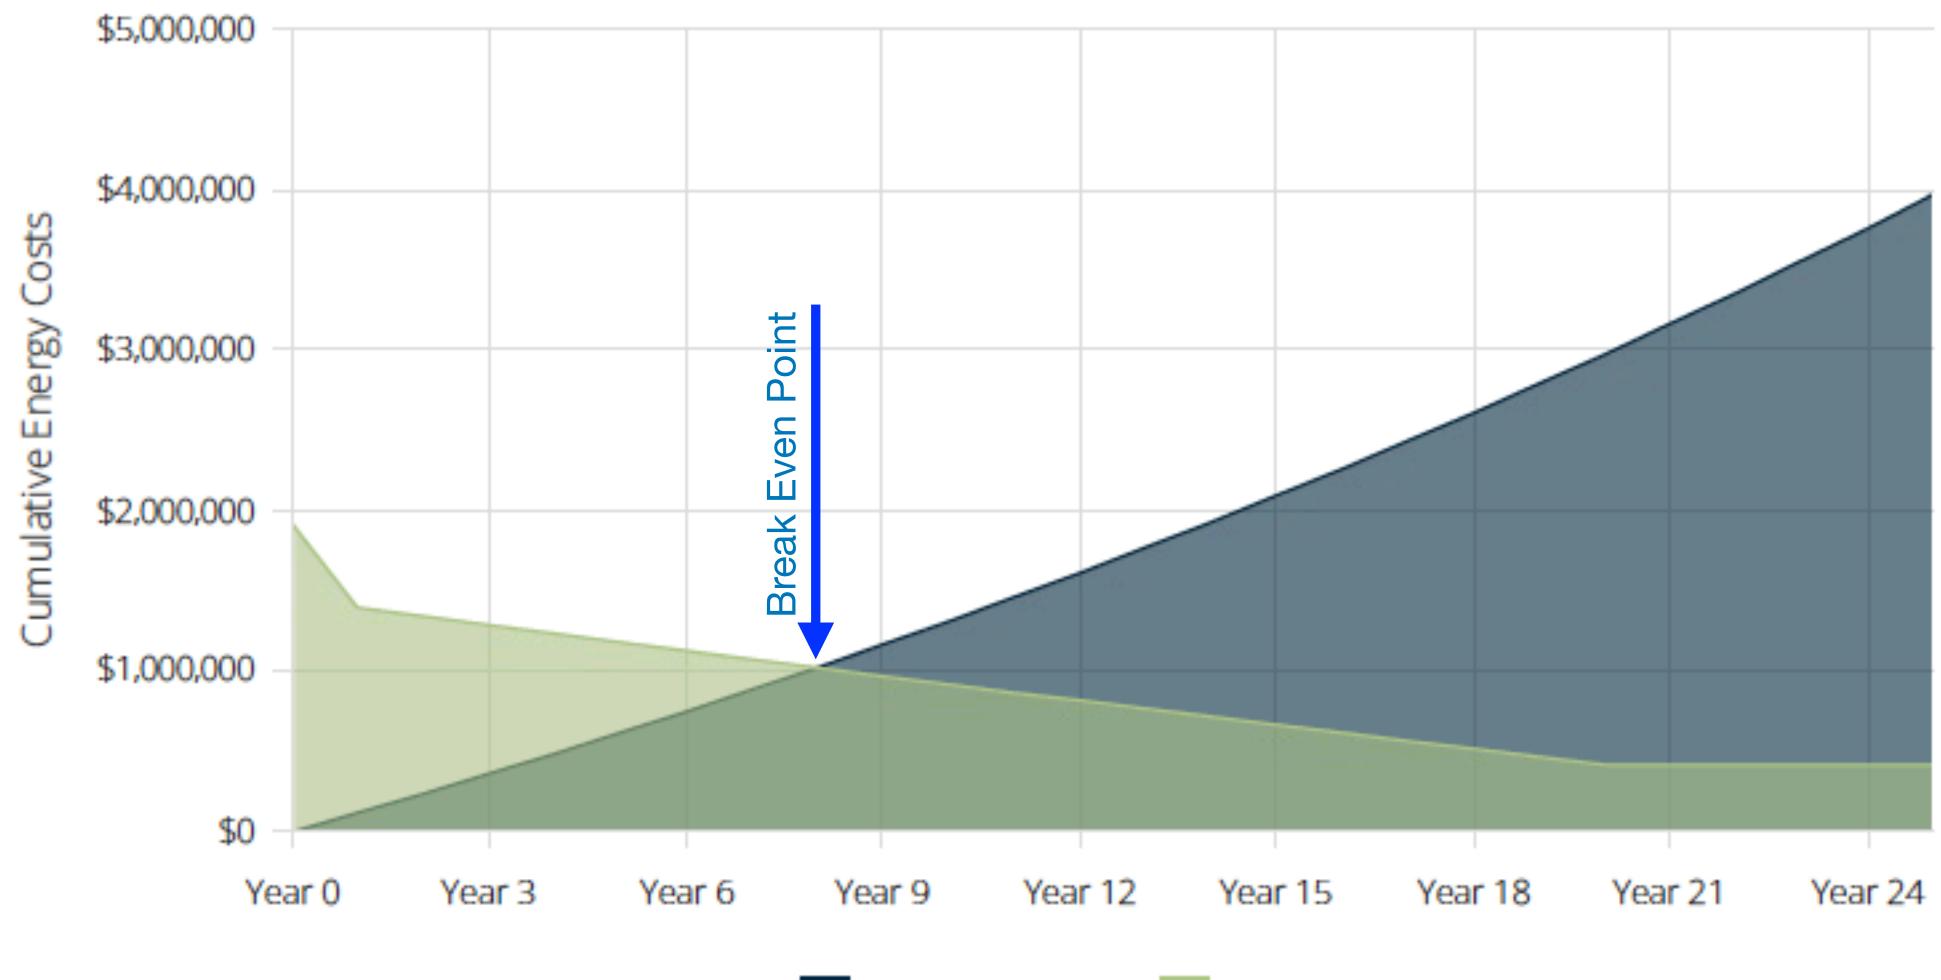

Solar Study | Energy Cost (Rooftop PV + Parking PV)

Cumulative Energy Costs By Payment Option

DINISCO DESIGN

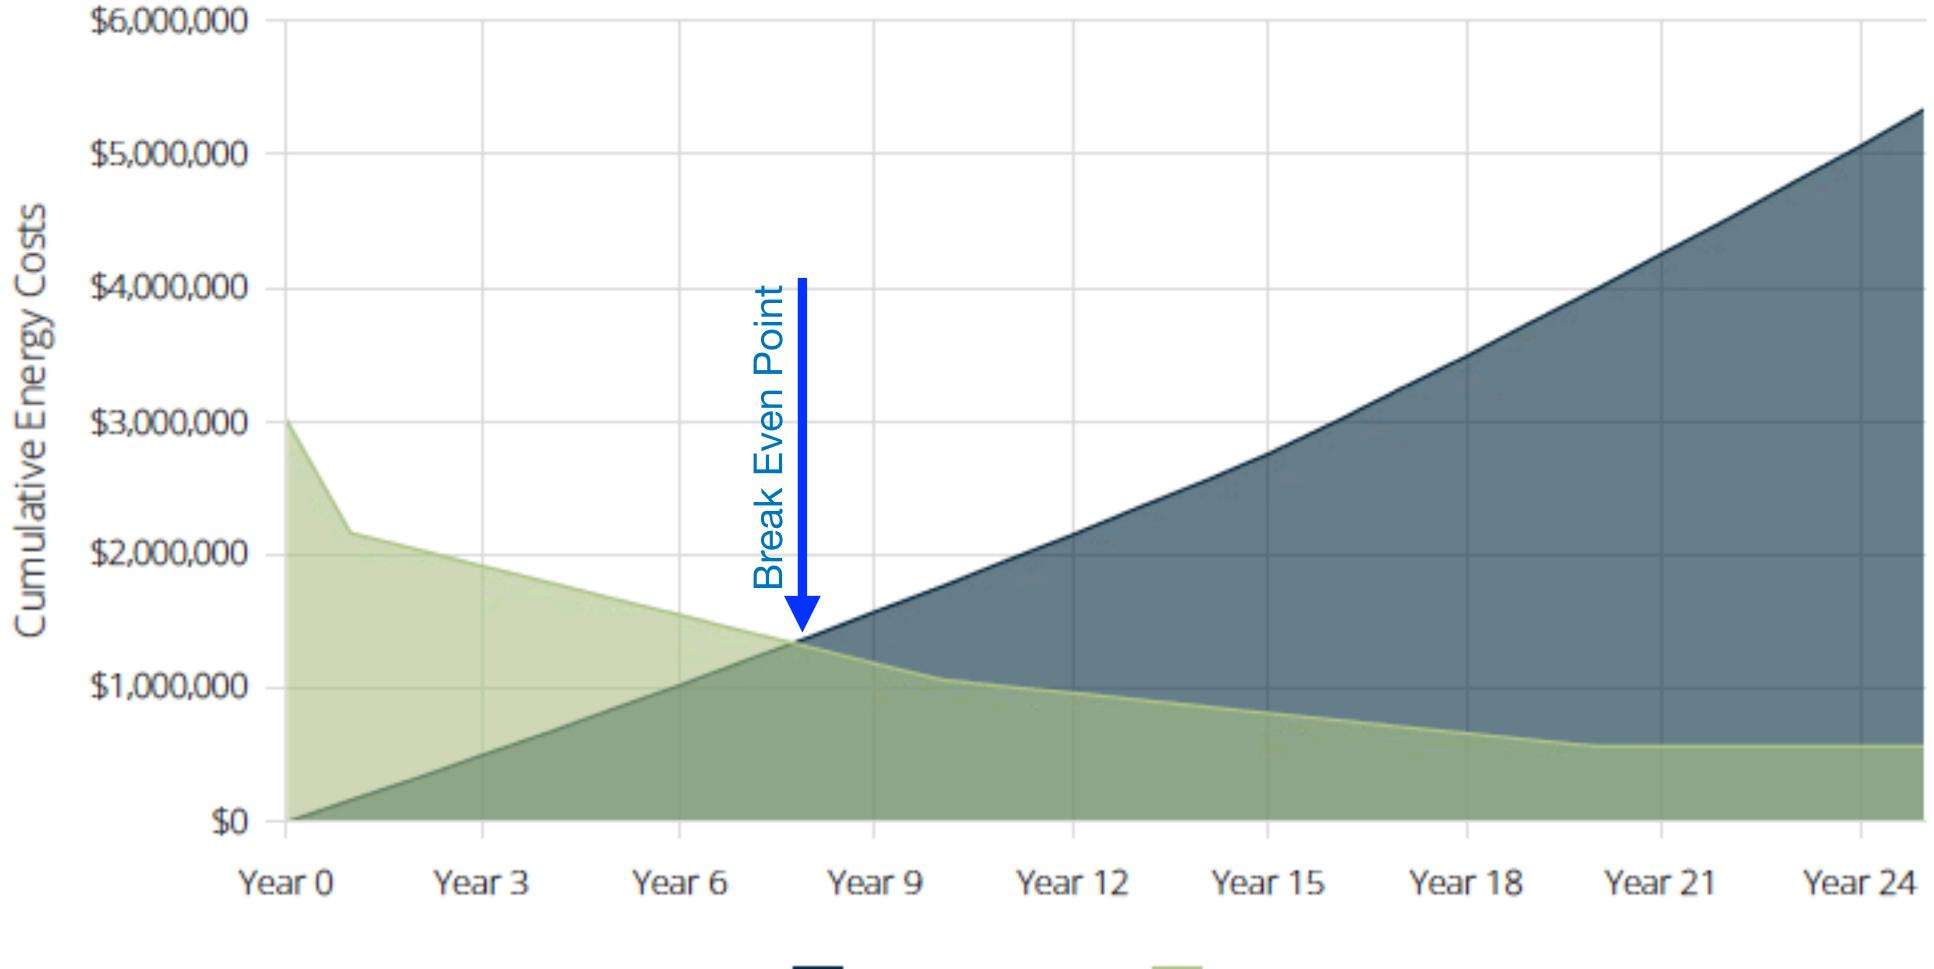

Avoided Utility Cost Cash Purchase

Solar Study | Energy Cost (Rooftop PV + Parking PV + Battery)

Cumulative Energy Costs By Payment Option

DINISCO DESIGN

SBC Meeting | 20 August 2024 9

Solar Study Cost Comparison					11		
Options	Upfront Cost	IRA ² Grants	SMART ³ Incentives	Net Cost	Generation Energy as Percent of Building Energy Use ¹	Payback Period	Annua Electrici Savings Y 1
Rooftop PV only	\$597,000	\$143,405	3 \$476,583	-\$22,988	<image/> <image/>	Years	\$75,64
Rooftop PV + Parking Canopy PV	\$1,907,020.00	\$457,685	\$1,037,544	\$411,791	102%	8.0 Years	\$117,26
Rooftop PV + Parking Canopy PV + Battery	\$3,007,020.00	\$721,685	\$1,725,044	\$560,291	102%	7.8 Years	\$163,30

Building energy use and generation energy are calculated on an annual basis
IRA (Inflation Reduction Act) grants are 100% paid when the system is operational.
SMART (Solar MAchusetts Renewable Target) incentives are declining block grants paid out over 20 years
